▶ BENEFITS -

Gain Efficiencies with Highly Automated Financial Processing

Automate journal processing for recurring and allocation journals. Convert and load raw data from external systems. Run posting, reporting, translation, and consolidation processes in parallel to accelerate reporting time

Establish and Maintain Superior Internal Controls

The chart of accounts can be customized to best fit your company's needs, and is used to control information access. Guarantee data integrity with a single ledger to manage all financial information. Actual, summary, foreign currency, balances are automatically synchronized, rendering reports immediately available and always accurate. Mandatory checks and balances prevent the occurrence of out-of-balance situations.

Capitalize on Global Opportunities

Capture and report on any number of currencies from the balance level. Currency conversion, revaluation, re-measurement, and translation performed in accordance with local and international accounting standards essentially; the general ledger serves as a complete record of all business transactions. It is the centralized, up- to-date reference for the rendering of accounts. Actual individual transactions can be checked at any time in real time processing by displaying the original documents, line items, and transaction figures at various levels such as:

- ▶ Account information
- ▶ Journals
- ▶ Total/transaction figures
- Balance sheet /profit and loss evaluations
- Report scheduling system

▶ SOLUTION INTEGRATION
